

ADINA REHMAN

Generative AI Engineer · Agentic Systems · RAG Pipelines

Bahawalpur, Pakistan · 0328-5437142 · adinarehman018@gmail.com · [adina-portfolio.vercel.app](#) · [github.com/adina-mini](#)

SUMMARY

AI/ML engineering student with hands-on experience building production-oriented LLM applications, multi-agent systems, and RAG pipelines. Skilled in LangGraph, LangChain, and grounded retrieval with ChromaDB and Pinecone. Experienced designing tool-orchestrating agents, guardrailed LLM behavior, and live automated deployments across internship and hackathon settings.

EXPERIENCE

AI/ML Intern — QM Logics

Jun 2026 – Sep 2026

Bahawalpur, Pakistan · On-site

- Shipped a **config-driven AI chatbot** (FastAPI + Groq) for QM Logics with zero-hallucination guardrails and LLM-based intent detection for automated lead qualification — demoed and confirmed working by company leadership.
- Built **stateful multi-agent systems** with LangGraph and AgentState using Planner, Researcher, and Writer roles for orchestrated task execution.
- Engineered a **legal/constitutional RAG pipeline** using ChromaDB, SentenceTransformers, and Groq Llama 3.1 for grounded retrieval and generation.
- Developed a **guardrailed async multi-tool agent** covering web search, calculator, currency conversion, and file I/O with validated tool execution, plus persistent cross-session memory with entity extraction.
- Building a **knowledge-based custom AI assistant for deployment on the company site**, with voice-enabled interaction (speech input and spoken responses) layered on top of the existing knowledge-base-grounded answer pipeline.

AI/ML Intern — DecodeLabs

May 2026 – Jun 2026

Remote

- Built a KNN classification pipeline, a TF-IDF/cosine-similarity job recommendation engine, and a NumPy neural network trained on XOR — applying feature representation, similarity scoring, and model evaluation from first principles.

Freelance AI Agent Developer — Self-Employed

2025 – 2026

Remote · ~1 year

- Designed and delivered **custom AI agent solutions for clients**, including LLM-powered task automation, tool-calling agents, and conversational assistants.
- Built **agent workflows using LangGraph/LangChain and LLM APIs** (OpenAI, Groq, Gemini), applying prompt engineering to keep outputs reliable and on-scope.

SELECTED PROJECTS

HeatOps Autopilot — FortyGuard Hackathon '26 — Agentic AI

Aug 2026

- Built and deployed an **autonomous LangGraph agent** that screens sites, investigates heat risk via the live FortyGuard Temperature API, scores risk, decides an action, sends automated email alerts, and records an auditable decision trail.
- Designed a **deterministic 0–100 risk-scoring engine** from peak temperature, exceedance hours, persistence, and working-hour overlap — auditable and tunable, not LLM-guessed.
- Verified against **live data across 8 real U.S. sites**; added 31 automated pytest tests covering risk boundaries and action policy.

Live: [adina-mini.github.io/heatops-autopilot/dashboard.html](#)

QM Logics AI Assistant — Company RAG Chatbot

- Architected a **two-tier fallback and LLM-native intent-classification layer** (hidden signal in model output, no separate classifier) to auto-surface consultation CTAs on pricing, competitor, or booking-intent queries.
- Built a **client-scoped, capped in-memory session store** with automatic eviction to bound memory growth and isolate session data. Stack: FastAPI, Groq (openai/gpt-oss-120b), vanilla JS widget.

RAG Technical Audit Analyst — n8n + Pinecone

May 2026

- Engineered an **n8n + Pinecone RAG workflow** to automate technical audit document analysis, cutting manual review time by 70%.

Lead Intake & Response Automation — Agentic n8n Workflows

- Architected **agentic n8n workflows** for intent-based lead classification and GPT-drafted outreach email generation.
- Smart Habit Architect (PWA)**: deployed an offline-first Progressive Web App using browser LocalStorage for reliable operation without internet connectivity.

TECHNICAL SKILLS

Generative AI / Agentic AI: LLMs, LangGraph, LangChain, RAG, Multi-Agent Systems, Prompt Engineering, OpenAI, Groq, Gemini

Automation / Data: n8n, Pinecone, ChromaDB, Pandas, NumPy, Regex, JSON, SQL

Programming: Python, JavaScript, C++, SQL, HTML/CSS

Frameworks / Tools: FastAPI, React.js, Node.js, Docker, Git, GitHub, Chart.js

EDUCATION

BS Artificial Intelligence — Govt. Sadiq College Women University, Bahawalpur

Expected 2028

FSc Pre-Engineering — The Leaders College, Bahawalpur

Completed 2024 · 87%

CERTIFICATIONS & PROGRAMS

Machine Learning Specialization (Stanford & DeepLearning.AI) · Google Prompting Essentials · Generative AI: Prompt Engineering Basics (IBM) · Building Generative AI-Powered Applications with Python (IBM) · Foundations of Coding Full Stack (Microsoft)

LEADERSHIP & ACTIVITIES

Legal Creator Fellow — Mehfooz.ai · Jul 2026–Present · AI-driven legal literacy content for a GenAI access-to-justice platform. · **AI Marketing Cohort Member** — FlyRank · Jul 2026
