

ADINA REHMAN

AI Developer | Software Engineer

Bahawalpur, Pakistan | adinarehman018@gmail.com | 03285437142 github.com/adina-mini | linkedin.com/in/adina-rehman-z

PROFESSIONAL SUMMARY

Innovative AI Orchestration Specialist with expertise in building intelligent automation workflows and generative AI solutions. Proven track record of converting manual processes into automated pipelines using n8n, LLMs, and sentiment analysis. Passionate about creating human-centered AI experiences that solve real business problems. Strong foundation in Python, data analysis, and prompt engineering.

AI & TECHNICAL COMPETENCIES

- **Agentic AI & Automation:** Expert in building agentic workflows via n8n, connecting LLMs to external APIs and tools.
- **Data Engineering:** High proficiency in JSON manipulation, SQL querying, and Python (Regex, Pandas) for dataset validation.
- **Quality Assurance:** Strong focus on data integrity, ensuring training sets are consistent, accurate, and optimized for LLM fine-tuning.
- **DevOps & Environment:** Experienced in Docker for containerized development and GitHub for version control.

TECHNICAL PROJECTS

RAG Technical Audit Analyst | *May 2026*

- Engineered a Retrieval-Augmented Generation (RAG) system using n8n and Pinecone to automate the analysis of complex technical audit documents.

- Developed high-efficiency workflows to ingest, vectorize, and query security datasets, significantly reducing manual analysis time by **70%**.

Smart Habit Architect (PWA) | *Early 2026*

- Developed and deployed a high-performance Progressive Web App on GitHub, focusing on clean code architecture and seamless data persistence[cite: 1, 2].
- Implemented offline-first functionality using the LocalStorage API to ensure 100% availability without internet connectivity.

Lead Intake & Response Automation

- Architected Agentic Workflows using n8n to automate the identification and engagement of industry experts, handling complex JSON data transfers.
- Built intent-detection logic for lead classification and automated email drafting using GPT-based prompt engineering.

Cybersecurity Vulnerability Assessment

- Conducted rigorous security testing, including SQL injection and XSS, to ensure data integrity and system robustness.
- Utilized industry-standard tools such as OWASP ZAP, Nmap, and Gobuster for comprehensive system auditing.

CERTIFICATIONS

Specializations

- **Machine Learning Specialization:** Stanford University & DeepLearning.AI.
- **Google Prompting Essentials Specialization:** Google.

Technical Courses

- **Design Prompts for Everyday Work Tasks:** Google.
- **Foundations of Coding Full Stack:** Microsoft.

- **Advanced Learning Algorithms:** Stanford University & DeepLearning.AI.
 - **Supervised Machine Learning (Regression and Classification):** DeepLearning.AI.
 - **Unsupervised Learning, Recommenders, Reinforcement Learning:** DeepLearning.AI.
 - **Generative AI: Prompt Engineering Basics:** IBM.
 - **Building Generative AI-Powered Applications with Python:** IBM.
 - **Software Developer Career Guide and Interview Preparation:** IBM.
 - **Introduction to HTML, CSS, & JavaScript:** IBM.
 - **Use AI as a Creative or Expert Partner:** Google.
-

TECHNICAL SKILLS

- **Languages:** Python (Data Handling), JavaScript, C++, SQL, HTML/CSS.
 - **AI/ML Tools:** n8n, Pinecone, OpenAI Embeddings, Prompt Engineering, Dataset Annotation.
 - **Frameworks & DevOps:** Docker, GitHub, Node.js, React.js.
-

LANGUAGES

- **English:** Fluent (Professional Working Proficiency).
 - **Urdu:** Native.
-

AVAILABILITY

- **Open for:** Full-time | Remote | Contract.
- **Notice Period:** Immediate.
- **Hours:** 20-40 hours/week (PST overlap available).

EDUCATION

- **Bachelor of Science in Artificial Intelligence (BSAI)** | *Expected 2028*
 - Government Sadiq College Women University (GSCWU), Bahawalpur.
- **FSc Pre-Engineering** | *Completed: 2024*
 - The Leaders College BWP, Bahawalpur.
